SPARTAN FC-94

PURPOSE-BUILT FOR THE JOB YOU DO.

A custom chassis with commercial appeal.

At Spartan, you're not an afterthought. With so much riding on every response, make sure your truck rides on a cab chassis that is purpose built from the ground up for the job you do. The FC-94 meets the requirements of a commercial chassis but delivers more in a custom configuration with unmatched safety, performance, and strength.

Purpose built to handle the heavy-duty requirements of pumpers, tankers, and rescues, the FC-94 is an NFPA compliant all-aluminum 94" wide cab built to keep crews comfortable and safe with high roof lines, flat floors, multiple seat and storage options, and a cramp angle that will deliver superior maneuverability in tight and congested areas.

OUR VEHICLES CONNECT AND PROTECT
PEOPLE AROUND THE WORLD EVERY DAY.

Interior Finish	Aluminum	Durable, heavy-duty

Purpose-Built

Built and tested to handle the requirements of pumper, tanker, and rescue configurations.

Safe. Tested. Proven.

NFPA compliant with a reinforced cab structure that exceeds FMVSS safety standards.

Safe & Spacious Cab

Flat floors, low step heights, and raised roof lines give firefighters more space inside the cab.

Maneuverability

Designed to handle heavy duty applications with a low center of gravity and front axle that is located behind the driver and officer delivers improved maneuverability on scene.

Heavy-Duty Aluminum Cab.

Construction methods and material selections are optimized to bring you the most robust frame on the market to hold up to the rigors and punishment dished out by hard-working fire departments.
